Discover the primary healthcare service that truly makes a difference in the quality of your health and well-being — Atlas Medical Concierge Medicine.

Offering the first medical concierge service in Australia — and one of the select few in the world — Atlas Medical Concierge (AMC) is a pioneer in customised primary health care. This patient-centered approach provides cost efficient premium care, while delivering a VIP experience that ensures continuity of care with your own doctor.

Available to a limited number of patients only, Atlas Medical Concierge delivers ultimate patient care and primary health services with a holistic and personalised experience focusing on prevention, early detection and treatment of chronic disease, malignancy and education.

Using the most sophisticated technologies available, Atlas Medical Concierge blends world-class care with the integration of quality healthcare services proven to optimise clinical outcomes.

Atlas Medical Concierge is the difference you deserve.
Atlas Medical Concierge services offers:

- Access to medical consultation and advice 24/7/365*
- Same or next day appointments
- Home visits and after-hours service*

Convenience and affordability
Concierge efficiency
Digital, and real time monitoring
Before you join
We at Atlas Medical Concierge believe that a positive patient/Doctor relationship is a key source to providing optimum health care. So we invite prospective members to start building that relationship even before they become members.

After speaking with you about your particular needs, we will schedule a consultation for you to meet one of the AMC Doctors. Spending time with your future partner in health will enable you to discuss your goals and concerns, and learn about your Doctors medical expertise and philosophy.

Your first assessment
Your comprehensive annual exam provides a baseline assessment of your overall health status and detailed information to help your Doctor to guide you in methods to optimise your total well-being. This evidence-based exam includes a history and physical, as well as thorough blood work and testing tailored to your specific needs or health concerns.

Additional testing, such as mammography, bone density scanning, colonoscopy, and abdominal ultrasound, may be ordered in alignment with evidence based guidelines and your specific health needs.
Atlas Medical Concierge is committed to you and to providing a comprehensive approach to disease prevention and health management.

At your follow-up appointment, your Doctor will provide full documentation and interpretation of the results. This follow-up, which can be in person, or remote, provides time for you and your Doctor to discuss your personal health portfolio, your progress and any concerns regarding your health examination.

Should the need arise, you will also have expedited access to world class specialists.

A fully integrated medical record system ensures that all your medical information is securely stored and accessed only by you and the members of your health team. Members can schedule appointments, request prescription refills, review health history and more—online, anytime.

After your first medical assessment...the Difference continues
About Dr Reza Madah

Dr. Madah is the practice principal of Atlas Medical Concierge and has over 20 years of experience in all areas of general medicine, with a special focus on cardiovascular and chronic diseases. His clinical and medical skills are strengthened by his extensive experience in intensive care medicine working in elite hospitals such as Prince Charles, Princess Alexandra, Greenslopes, Allamanda and Pindara Private hospitals, as well as other premier facilities.

Dr. Madah is an expert in chronic disease management, diabetes, prevention and detection of malignancy, pre-operation assessment and post major operation care, including pain management and palliative care.

He takes a holistic and patient-centred approach with all of his clients. His main goal is to provide each client with the dedicated and individualised health care they deserve.
